

You have a project you need to protect from the elements, but you want to use a coating that won't compromise your family, your home or your environment. Fortunately the technology now exists to give you the durability you need with low odour, easy application and water cleanup. BRODA® is a line of high-performance eco-friendly coatings formulated here in Canada to withstand our environment and help protect it at the same time.

*PRO·TEK·TOR - Water-borne  
Natural Oil Wood Finish*

BRODA® PRO·TEK·TOR contains oxide and trans-oxide pigments, very finely ground colours, suspended in linseed oil, tung oil and water. This combination penetrates easily, even into wood that is damp or 'green'. The water opens the spaces between the cells of the wood, drawing in the oils and protective pigments. The addition of UV blockers and anti-mildew ingredients makes this family of coatings ideal for outdoor applications. When used indoors, PRO·TEK·TOR is equally effective, with no harsh solvent fumes and a rich, colourful finish you'll appreciate for years to come.

*CLARITY - Eco-Friendly  
100% Acrylic Finishes*

This family of water-based coatings creates a vapour permeable, flexible film with great UV stability and water repellency. The natural affinity of water to wood, concrete and stone, combined with the ultra small size of the acrylic particles, allows for fast, deep penetration. Cold weather, high humidity, damp or dry substrates are no problem, allowing application virtually year round in many climates. These non-yellowing, 100% acrylic finishes bond well to alkyd resins, and on exterior wood, work best over an oil-based wood finish.

*PRO·THANE - Water-borne  
Polyurethane Finish*

These finishes provide hard, tough, abrasion resistant films. Polyurethane is formulated with acrylic and oil in various combinations to create high performance, durable coatings for floors, stairs, cabinets, trim and protected exterior applications. Available in traditional rich amber or ultra-clear non-yellowing formulas.

Siding · stairs · brooks · bears  
walls · shakes · lakes · logs  
dogs · rails · decks · ducks  
floors · timbers · timberwolves  
doors · stones · cliffs · bricks  
cupboards · sticks · wood  
water · concrete · roof · sky  
Protect it all.™

*Eco-Friendly Industrial and Commercial Products*

CBR Products also carries a complete line of commercial-grade cleaners, sealers and coatings, including ASC Concentrated All Surface Cleaner, EFF-OFF! Efflorescent Remover, 601C Water Holdout and 501AG Anti-Graffiti Coating. Visit our web site or call your local BRODA® Dealer to find out more.

**BRODA® PRO·TEK·TOR**  
High-Performance water-borne oil wood finish. The perfect choice for protecting and enhancing wood's natural beauty.

**PRO·TEK·TOR**  
SIDING·LOG·TIMBER

Siding Log Timber (SLT)  
Premium Exterior/Interior  
Natural Oil Wood Finish

**Use on:** Exterior - siding, wall shingles and shakes, logs, timbers, soffits  
Interior - logs, timbers, ceiling decking, wall paneling, trim, doors, windows  
Damp, "green" or dry wood

**Why:** Adds maximum oil to wood to reduce checking, cracking & twisting  
Formulated for easy application and maintenance on vertical surfaces  
Provides excellent mildew resistance and necessary water repellency  
Colours that maximize the natural beauty of wood

**Top coat:** Exterior - SLT Clear UV Top Coat, Clarity WS

Interior - SLT Clear UV Top Coat, Clarity WS, Pro-Thane Ultra Rich

**Colours:** more than fifty standard colours

Clear, transparent, semi-transparent and semi-solid

**PRO·TEK·TOR**  
DECK·RAIL

Deck Rail (DR)  
High performance  
Natural Oil Wood Finish

**Use on:** Decks, railings, fences, fascia, windows, garden furniture, docks; Damp, "green" or dry wood

**Why:** Best protection for horizontal and fully exposed wood  
Superior water repellency; Increased level of pigments for ultimate UV protection; Formulated for easy maintenance and durability

**Top coat:** DR Clear UV Top Coat

**Colours:** More than fifty standard colours  
Clear, transparent, semi-transparent and semi-solid

PRO·TEK·TOR Roof Treatment (RT)  
Natural Oil Wood Finish

**Use on:** Wood roofs **Why:** Industrial pigments for superior UV protection; Excellent water repellency; Roof can "breathe"; Reduces moss and algae growth; Extends life of roof with regular maintenance

**Coverage:** 75 sq. ft./gal./coat

Professional application recommended

**Colours:** More than fifty standard colours

Transparent, semi-transparent, semi-solid

**BRODA® PRO·TEK·TOR**

**Coverage:** 150 - 300 sq. ft. / gal. /per coat

**Application:** 2 coats, apply to bare wood, no priming required. Power wash rough wood, sand smooth wood 50-80 grit **Cleanup:** Soap and water

## How does water borne oil finish work?

1. Natural oil is temporarily bonded to water, pigments are suspended in this liquid. Apply as much to the wood as can be absorbed.

2. Water opens the cells of the wood, promoting deep penetration, carrying oil and pigment into dry, damp or "green" wood.

3. Water evaporates, leaving oil bonded to the wood, locking in pigments. Fungal resistant, vapour permeable finish repels water and resists UV damage.

4. Brushes clean up with water, flushing away excess natural oils and pigments. No harsh solvents required.

*Any more questions?*

1-888-311-5339 · www.cbrproducts.com

*All BRODA® coatings clean up with soap & water! Brushes and rollers last longer, and there are no harsh paint thinners to inhale or dispose of later.*

**BRODA® PRO·THANE**

Our toughest, most abrasion resistant coating. Low VOC, low-odour, non-flammable.

**PRO·THANE**  
ULTRA-RICH  
CABINET·TRIM

Oil Modified Urethane/Acrylic  
Satin and Gloss (UR CT)

**Use on:** Cabinets, millwork, interior timber and logs, doors, protected exterior wood

**Why:** Tough, durable, dent resistant; Amber hue to give depth of grain and rich looking wood; Quick to dry, recoats very easily  
Tintable, very low odour

**PRO·THANE**  
ULTRA-RICH  
FLOOR·STAIR

Oil Modified Urethane (UR FS)  
Satin and Gloss

**Use on:** Interior floors and stairs

**Why:** Hard, tough, abrasion resistant; Amber hue to give depth of grain and rich looking wood; Quick to dry, recoats easily  
Tintable, very low odour

**PRO·THANE**  
ULTRA-CLEAR  
CABINET·TRIM

Urethane/Acrylic (UC CT)  
Satin and Gloss

**Use on:** cabinets, millwork, wall paneling, dry interior timber and logs, interior doors

**Why:** Clear, non-ambering, wood colour remains the same; Very quick to dry, recoats easily; Tough, dent resistant finish; Tintable; Low odour

**PRO·THANE**  
ULTRA-CLEAR  
FLOOR·STAIR

Urethane (UC FS)  
Satin and Gloss

**Use on:** Interior floors and stairs

**Why:** Hard, tough, very abrasion resistant; Clear, non-ambering, wood colour remains the same; Very quick to dry, recoats easily  
Tintable, low odour

**BRODA® PRO·THANE**

**Coverage:** 350 sq. ft./gal./coat **Application:** 2 or more coats  
Note: moisture content of wood must be less than 12%

**Cleanup:** Soap and water

Protect it all.™

Developed in the varied coastal climate of British Columbia, BRODA® coatings offer proven durability through the harshest conditions.

**BRODA® CLARITY** Water-based 100% acrylic coating for wood, stone concrete, & masonry. Forms flexible, UV stable, vapour permeable film.

**CLARITY**  
WOOD·STONE

Wood Stone (WS)  
Premium Acrylic Finish

**Use on:** Concrete, stone, wood, masonry damp, "green" or dry wood, cured or "green" concrete  
**Why:** Higher solids for more sheen - thicker film; Gives "wet look" or satin sheen; Water repellent, non-ambering top coat over Pro-Tek-Tor on wood  
Light reflecting satin sheen for soffits and ceiling decking

**CLARITY**  
MASONRY·CONCRETE

Masonry Concrete (MC)  
Premium Acrylic Sealer

**Use on:** Concrete, stone, wood, masonry  
Damp, "green" or dry wood, cured or "green" concrete  
**Why:** Lower solids for deeper penetration - less film; Matte finish - leaves substrate looking unchanged; Reduces stains from dirt and algae; Tintable

**CLARITY**  
DOOR·TRIM

Door Trim (DT)  
Fortified Acrylic Coating

**Use on:** Interior trim, doors, windows, logs, timbers  
**Why:** Hardest of the Broda acrylics; Non-ambering, dries quickly  
Less expensive than urethane; Tintable

**BRODA® CLARITY**

**Coverage:** 100 - 400 sq. ft./gal./coat **Application:** 1, 2 or 3 coats  
**Cleanup:** Soap and water
